Built Green

Join your building industry colleagues at the 2004 BUILT GREEN™ Conference. This daylong event will focus on building and selling green communities and includes a look at the Puget Sound Energy BUILT GREEN™ Idea Home. The conference will also feature nationally known builder and developer Bob Brownell of Bielinski Homes who will speak on his success with low-impact development in Wisconsin.

Conference Highlights:

- Guided tour of the PSE BUILT GREEN™ Idea Home at Issaquah Highlands
- Presentation by Bob Brownell on the value of low-impact development
- Panel discussion on selling BUILT GREEN™ to your customers
- “How-To” session on building profits from energy efficiency features
- Workshop on the merits of environmental home products for custom builders and remodelers
- Integrated design workshop for multi-family builders

Who should attend:

- Builders/Remodelers
- Developers
- Realtors
- Architects
- Mortgage Brokers
- Municipalities
- Planners

BUILT GREEN™ is an environmental building program of the Masters Builder Association in partnership with King and Snohomish Counties.

About the Conference

Bob Brownell of Bielinski Homes – Named the Wisconsin Daily Reporter's 2003 "Innovator of the Year," Bob is the environmentally conscious CEO of Bielinski Homes. Under Brownell's leadership, the company has "gone green," changing its focus from conventional grid to low-impact housing development.

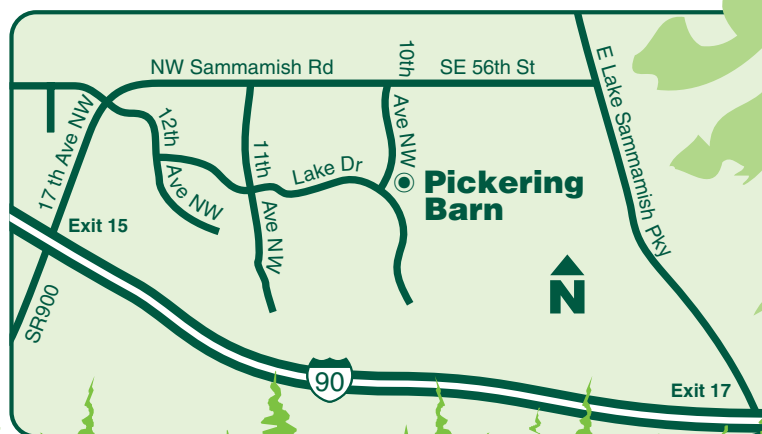

Puget Sound Energy BUILT GREEN™ Idea Home

– Designed by Mithun Architects and built by Bennett Homes, this beautiful house showcases the latest in BUILT GREEN™ innovations. A technical workshop and guided tours of this home will highlight features such as the tankless water heater, efficient hydronic/warm air heating systems, passive solar design, low-toxic and 'green' finish materials and water-wise landscaping.

Technical Tracks

– The conference will feature educational tracks on green building strategies, including energy efficiency, green material choices, improved indoor air quality, and low-impact development techniques. These sessions will provide valuable information tailored to single- and multi-family, custom home and remodel building projects.
